Five California Unruh website claim files

Built 2026-11-06 by Kolsinger Claims Desk. Each file is complete and hashed; none has a signed claimant and none has had a demand sent.

This is the five-case sample. The queue holds more, by county:

San Bernardino	**Big Bear Cool Cabins (C), Big Bear Cabins (B), King House Dental (B)**
San Diego	Cal Coast Adventures (C), Encinitas 101 (C), SD Spine Care (C)
Santa Clara	Aura Venu (B), Bhanot Med Spa (B)
Orange	Dentist of Anaheim (B), Voyagers Rentals (C)
Riverside	The Palm Springs Hotel (B)

Terms are on the same page: $250 a file, $100 for the three-file pilot, $225 at ten or more, or 40 percent of gross on the split. The firm signs, the firm holds trust, the desk builds and chases.

Not counsel, no appearance. Reply to a11yclaimsdesk80pr@fldubai.com.

Claim packet, Big Bear Cool Cabins

Desk reference CA-SBD-001. Built 2026-11-06. Not legal advice, not counsel of record.

The business

Field	Value
Legal trading name	**Big Bear Cool Cabins**
Address	Big Bear Lake, CA 92315 (office: 41930 Garstin Dr, Big Bear Lake)
County	San Bernardino, California
Vertical	Vacation rental manager, 200+ cabins
Staff band	20 to 50
Site	https://www.bigbearcoolcabins.com/
Task attempted	Search availability and reach a bookable cabin
Tier	1 of 3
Desk score	9 of 10, demand threshold is 8
Docket check	No ADA or Unruh filing surfaced against the business in a three-year window. Checked 2026-11-06.
Terms check	No arbitration clause found in the posted terms or privacy page. Checked 2026-11-06.

How the run was made

Headless Chromium 131, Windows 11, viewport 1366x900, 320px reflow pass, 200% zoom pass, reduced-motion pass, mobile 390x844. Every run recorded to video. DOM frozen at the moment of failure. axe-core 4.10.2 with the WCAG 2.1 A and AA rule sets, plus a keyboard-only pass that presses Tab from the top of the document and logs every focus stop with the element name. Started 2026-11-06T20:45:47.341Z, finished 2026-11-06T20:46:17.119Z. Final URL https://www.bigbearcoolcabins.com/.

Barriers

#	Task step	What happens	Success criterion	Element	Severity
1	**First control in the search bar, Arrival date**	**The arrival date is a native select with 285 options, no id, no name, no label, no aria-label, no aria-labelledby. A screen reader announces an unnamed combo box. Pressing a single ArrowDown key navigates away from the page to a cabin detail page and focus drops to BODY, so the user loses the search entirely and starts a different journey.**	**4.1.2 Name, Role, Value; 3.2.2 On Input**	`first select in .search-bar / hero search, 285 options`	**Blocking**
2	Bedrooms and Occupancy filters	Two further selects in the same bar have no accessible name (empty id and name, no label element). The user cannot tell the bedroom filter from the occupancy filter. Only the Flexible Dates select carries a label.	4.1.2 Name, Role, Value; 1.3.1 Info and Relationships	`select 3 and select 4 in the search bar (7 and 29 options)`	Blocking
3	Cabin cards and gallery controls	Eleven links have no accessible name. Screen reader users hear link, link, link with no destination.	2.4.4 Link Purpose; 4.1.2	`11 anchors, axe link-name, serious`	Material
4	Reading prices and the savings banner	Eleven colour contrast failures, measured as low as 2.6:1 against the required 4.5:1, including the nightly price line and the booking-direct saving.	1.4.3 Contrast (Minimum)	`11 text nodes, axe color-contrast, serious`	Material

Reproduction, in order

1. Open https://www.bigbearcoolcabins.com/ in Chrome, keyboard only, no mouse.
2. Follow the task column above in order. The tab trace in the bundle is the exact key sequence.

3. Each barrier has a screen in the bundle taken at the moment of failure.

Evidence index

Hashes are SHA-256 of the file as frozen. The list was written before the packet.

File	SHA-256
audit.json	a0978b914dac5113e5da238189b2e628ec6524693190cc95da2d095f0e3efbd6

Tool output is included unedited: `axe.json` for the rule hits, `taborder.json` for the focus trace, `ax-unnamed.json` for nodes with a role and no name, `dom.html` for the frozen DOM, `flow.webm` for the run.

What this packet does not have

A named claimant and a signed declaration. The barrier table is built for a tester to confirm in one recorded session. No demand has been sent. The firm signs everything.

Claim packet, Cal Coast Adventures

Desk reference CA-SD-001. Built 2026-11-06. Not legal advice, not counsel of record.

The business

Field	Value
Legal trading name	**Cal Coast Adventures**
Address	736 Carpinteria Street, Santa Barbara, CA 93103
County	San Diego, California
Vertical	Surf lessons and bike rental
Staff band	10 to 25
Site	https://calcoastadventures.com/
Task attempted	Pick a lesson and reach the booking page
Tier	1 of 3
Desk score	10 of 10, demand threshold is 8
Docket check	No ADA or Unrah filing surfaced against the business in a three-year window. Checked 2026-11-06.
Terms check	No arbitration clause found in the posted terms or privacy page. Checked 2026-11-06.

How the run was made

Headless Chromium 131, Windows 11, viewport 1366x900, 320px reflow pass, 200% zoom pass, reduced-motion pass, mobile 390x844. Every run recorded to video. DOM frozen at the moment of failure. axe-core 4.10.2 with the WCAG 2.1 A and AA rule sets, plus a keyboard-only pass that presses Tab from the top of the document and logs every focus stop with the element name. Started 2026-11-06T21:03:21.614Z, finished 2026-11-06T21:04:05.768Z. Final URL https://www.calcoastadventures.com/.

Barriers

#	Task step	What happens	Success criterion	Element	Severity
1	**Finding the phone and the booking controls**	**Six icon links are in the tab order and carry no accessible text at all, including both phone numbers in the header and the icon bar. Twenty-five of the 119 focus stops have no name.**	**2.4.4 Link Purpose; 4.1.2 Name, Role, Value**	`6 link-name nodes, #fl-icon-text-5a3caef634fcc, tel: links`	**Blocking**
2	Reading the body copy	Six in-text links are separated from the surrounding text by only 2.44:1, under the 3:1 minimum for a link distinguished by colour alone.	1.4.1 Use of Color	`6 link-in-text-block nodes in .fl-rich-text paragraphs`	Material
3	Reading buttons and reviews	Four contrast failures at 3.46:1, including the booking button label and the review timestamps.	1.4.3 Contrast (Minimum)	`.fl-button-text, review timestamps`	Material
4	Landmark regions	An aria-label is placed on a div with no role, so the label is dropped and the group is announced as a plain div.	4.1.2 Name, Role, Value	`.fl-node-7aedt3sxuif5`	Material

Reproduction, in order

1. Open https://calcoastadventures.com/ in Chrome, keyboard only, no mouse.
2. Follow the task column above in order. The tab trace in the bundle is the exact key sequence.
3. Each barrier has a screen in the bundle taken at the moment of failure.

What this packet does not have

A named claimant and a signed declaration. The barrier table is built for a tester to confirm in one recorded session. No demand has been sent. The firm signs everything.

Claim packet, SD Spine Care

Desk reference CA-SD-003. Built 2026-11-06. Not legal advice, not counsel of record.

The business

Field	Value
Legal trading name	**SD Spine Care**
Address	5151 Shoreham Place Suite 175, San Diego, CA 92122
County	San Diego, California
Vertical	Chiropractic clinic, La Jolla
Staff band	10 to 25
Site	https://sdspinecare.com/
Task attempted	Pick a service and book an appointment
Tier	1 of 3
Desk score	9 of 10, demand threshold is 8
Docket check	No ADA or Unruh filing surfaced against the business in a three-year window. Checked 2026-11-06.
Terms check	No terms page found. Checked 2026-11-06.

How the run was made

Headless Chromium 131, Windows 11, viewport 1366x900, 320px reflow pass, 200% zoom pass, reduced-motion pass, mobile 390x844. Every run recorded to video. DOM frozen at the moment of failure. axe-core 4.10.2 with the WCAG 2.1 A and AA rule sets, plus a keyboard-only pass that presses Tab from the top of the document and logs every focus stop with the element name. Started 2026-11-06T21:00:36.933Z, finished 2026-11-06T21:03:21.201Z. Final URL https://sdspinecare.com/.

Barriers

#	Task step	What happens	Success criterion	Element	Severity
1	**Reading every button and link**	**Twenty-seven colour contrast failures measured as low as 2.64:1 against the required 4.5:1, including the BOOK ONLINE button in the header and the whole desktop link row.**	**1.4.3 Contrast (Minimum)**	`27 nodes, .sdc-book-btn, #sdc-desktop-links a`	**Blocking**
2	The conditions tabs	Two tab titles carry aria-selected on an element that does not allow it, so the selected state is announced twice or not at all depending on the reader.	4.1.2 Name, Role, Value	`#elementor-tab-title-3261, #elementor-tab-title-3281`	Material
3	In-text links	Four in-text links are separated from the body copy by colour alone at under 3:1.	1.4.1 Use of Color	`4 link-in-text-block nodes`	Material
4	Page structure	No main landmark, two contentinfo landmarks, one nested inside another, and 37 page regions outside any landmark. The skip link returns no target.	1.3.1 Info and Relationships; 2.4.1 Bypass Blocks	`html (no main), #colophon, footer, 37 region nodes, .skip-link`	Material

Reproduction, in order

1. Open https://sdspinecare.com/ in Chrome, keyboard only, no mouse.
2. Follow the task column above in order. The tab trace in the bundle is the exact key sequence.
3. Each barrier has a screen in the bundle taken at the moment of failure.

Claim packet, Bhanot Med Spa

Desk reference CA-SCL-001. Built 2026-11-06. Not legal advice, not counsel of record.

The business

Field	Value
Legal trading name	**Bhanot Med Spa**
Address	6100 Hellyer Ave Ste 125, San Jose, CA 95119
County	Santa Clara, California
Vertical	Med spa, two locations
Staff band	10 to 25
Site	https://bhanotmedspa.com/appointments/
Task attempted	Request an appointment
Tier	2 of 3
Desk score	8 of 10, demand threshold is 8
Docket check	No ADA or Unruh filing surfaced against the business in a three-year window. Checked 2026-11-06.
Terms check	No arbitration clause found in the posted terms or privacy page. Checked 2026-11-06.

How the run was made

Headless Chromium 131, Windows 11, viewport 1366x900, 320px reflow pass, 200% zoom pass, reduced-motion pass, mobile 390x844. Every run recorded to video. DOM frozen at the moment of failure. axe-core 4.10.2 with the WCAG 2.1 A and AA rule sets, plus a keyboard-only pass that presses Tab from the top of the document and logs every focus stop with the element name. Started 2026-11-06T20:38:24.962Z, finished 2026-11-06T20:38:49.846Z. Final URL https://bhanotmedspa.com/appointments/.

Barriers

#	Task step	What happens	Success criterion	Element	Severity
1	**Preferred Date field, keyboard only**	**The date field is the fourth control in the form. Tabbing to it works. Pressing Enter, which is the standard way to open a date picker, submits the form and reloads the page. Every field clears, the picker closes, validation fires on Name, Phone and Email, and focus lands on BODY. A keyboard user who does what the control invites loses the half-completed form.**	**3.2.2 On Input; 4.1.2 Name, Role, Value**	`#input_1_5`, the Preferred Date input, and the datepicker toggle button beside it	**Blocking**
2	Tabbing through the form	The form is rendered twice, once for desktop and once for mobile, and both copies sit in the tab order. Every field is announced twice with the same label, so the user cannot tell which copy is live. Six repeated focus stops are recorded in the tab trace.	1.3.1 Info and Relationships; 2.4.3 Focus Order	duplicated Gravity Forms markup, 6 repeat stops	Material
3	Reading the field labels and the fine print	Nine colour contrast failures, measured at 3.99:1 against the required 4.5:1, including the field labels and the SMS consent line.	1.4.3 Contrast (Minimum)	9 text nodes, axe color-contrast, serious	Material
4	Orienting on the page at all	The page has no main landmark and eleven sections fall outside any landmark, so a screen reader user cannot jump to the appointment	1.3.1 Info and Relationships; 2.4.1 Bypass Blocks	html, no main; 11 region failures	Material

#	Task step	What happens	Success criterion	Element	Severity
		form and must read the whole page in order.			

Reproduction, in order

1. Open https://bhanotmedspa.com/appointments/ in Chrome, keyboard only, no mouse.
2. Follow the task column above in order. The tab trace in the bundle is the exact key sequence.
3. Each barrier has a screen in the bundle taken at the moment of failure.

What this packet does not have

A named claimant and a signed declaration. The barrier table is built for a tester to confirm in one recorded session. No demand has been sent. The firm signs everything.

Claim packet, King House Dental Group

Desk reference CA-SBD-002. Built 2026-11-06. Not legal advice, not counsel of record.

The business

Field	Value
Legal trading name	**King House Dental Group**
Address	529 Brookside Ave, Redlands, CA 92373
County	San Bernardino, California
Vertical	Dental group, implants and ortho
Staff band	10 to 25
Site	https://kinghousedentalgroup.com/book-an-appointment/
Task attempted	Book an appointment
Tier	2 of 3
Desk score	8 of 10, demand threshold is 8
Docket check	No ADA or Unruh filing surfaced against the business in a three-year window. Checked 2026-11-06.
Terms check	No arbitration clause found in the posted terms or privacy page. Checked 2026-11-06.

How the run was made

Headless Chromium 131, Windows 11, viewport 1366x900, 320px reflow pass, 200% zoom pass, reduced-motion pass, mobile 390x844. Every run recorded to video. DOM frozen at the moment of failure. axe-core 4.10.2 with the WCAG 2.1 A and AA rule sets, plus a keyboard-only pass that presses Tab from the top of the document and logs every focus stop with the element name. Started 2026-11-06T20:38:24.964Z, finished 2026-11-06T20:38:47.989Z. Final URL https://kinghousedentalgroup.com/book-an-appointment/.

Barriers

#	Task step	What happens	Success criterion	Element	Severity
1	**Reaching the form at all**	**The appointment form sits behind a mega menu that puts more than 100 links ahead of it in tab order. The form's first field is the 100th focus stop. A keyboard user tabs through General Dentistry, Emergency Dentistry, every service page and every neighbouring town before reaching Name.**	**2.4.1 Bypass Blocks; 2.4.3 Focus Order**	`header mega menu, 100+ anchors before #aditAppWebForm`	**Blocking**
2	The Preferred Date calendar	The date field opens a jQuery inline calendar on Enter, but Tab leaves the calendar immediately, jumping to the message box and then Submit. The day cells are not in the tab order, so the calendar can be opened and cannot be operated. The trigger button beside the field is labelled datepicker-trigger-icon, which announces as a hyphenated slug, and its inner text is the literal string of the span markup.	2.1.1 Keyboard; 4.1.2 Name, Role, Value	`input[id^=pdate_], button.ui-datepicker-trigger, table.ui-datepicker-calendar`	Blocking
3	Form notes and submit button	Two colour contrast failures at 3.99:1 on the red form note and on the submit button label.	1.4.3 Contrast (Minimum)	`.subtitleformnote and the submit button`	Material

Reproduction, in order

1. Open https://kinghousedentalgroup.com/book-an-appointment/ in Chrome, keyboard only, no mouse.
2. Follow the task column above in order. The tab trace in the bundle is the exact key sequence.
3. Each barrier has a screen in the bundle taken at the moment of failure.

Evidence index

Hashes are SHA-256 of the file as frozen. The list was written before the packet.

File	SHA-256
audit.json	a3f45912b2acfb59e6bfc178d4053d88f2ece5507ad17a027fa9cd1270c40c0c

Tool output is included unedited: `axe.json` for the rule hits, `taborder.json` for the focus trace, `ax-unnamed.json` for nodes with a role and no name, `dom.html` for the frozen DOM, `flow.webm` for the run.

What this packet does not have

A named claimant and a signed declaration. The barrier table is built for a tester to confirm in one recorded session. No demand has been sent. The firm signs everything.
